ABOUT US

AIET partners with schools to provide quality vocational education and training (VET) to students as part of their senior secondary certificate of education. Our friendly team boasts years of experience in the VET in schools space and is committed to our focus on support, providing teachers and coordinators with industry-leading assessments and resources, and ongoing flexibility to suit the unique needs of secondary schools and their students.

Our programs are designed in consultation with industry and offer a range of flexible assessment strategies and frameworks. VET strengthens a school’s curriculum by giving students the opportunity to gain knowledge that complements their other senior secondary studies, and provides practical workplace skills for careers that students are passionate about.

AIET programs are designed to reflect best practice in the workplace and meet the skills needs of each industry qualification, while providing flexibility for students and teachers alike. Our support processes for teachers and VET Coordinators make it easier for schools to deliver quality VET programs, inside a simple and easy to navigate platform.

AIET encourages Structured Workplace Learning (SWL) as a valuable component of any VET program.

SWL involves on-the-job training in which students are required to master a designated set of skills and competencies related to VET programs. SWL complements the training undertaken at the school. It provides the context for:

- Enhancement of skills development
- Practical application of industry knowledge
- Increased employment opportunities

All hours listed are Nominal Hours, taken from the relevant Purchasing / Nominal Hours Guide.

CPC10120 CERTIFICATE I IN CONSTRUCTION

QUALIFICATION: 11 units of competency (8 Core, 3 Elective)

COURSE DURATION: 1 year

This qualification introduces the student to the construction industry, its culture, occupations, job roles and workplace expectations.

The units of competency cover essential work health and safety requirements, the industrial and work organisation structure, communication skills, work planning, and basic use of tools and materials.

The qualification is built around a basic construction project unit that integrates the skills and embeds the facets of employability skills in context.

22499VIC CERTIFICATE II IN ELECTROTECHNOLOGY (PRE-VOCATIONAL)

QUALIFICATION: 15 units of competency (13 Core, 2 Electives)

COURSE DURATION: 2 years

This qualification prepares students to enter the electrotechnology industry. It covers competencies at work entry level providing grounding in safety and basic skills and knowledge for work in many electrotechnology disciplines. The training is mainly project based and gives industry relevant hands-on experience in a realistic simulated environment. It also includes training in the fundamentals of electrical, telecommunication, refrigeration, and air conditioning systems as well as workshop experience in fabrication and assembly techniques, wiring, cabling, basic installation skills and use of test equipment. The student will learn how to read circuit diagrams, take electrical measurements, and perform electrical calculations.
